Examiner's Detailed Office Action

Response to Amendment

1. This Office Action is responsive to communication received on December 09, 2005.
2. Claim 1 has been examined.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by
Kancko (USPN 5,959,861).

Regarding claim 1. *Kancko* teaches a disturbance estimated-type control system [*see* FIG. 3, C 10, L 08 to C 11, L 36] comprising: a control object based on a mathematical model comprised of one of a state equation and a transfer function and prepared by system identification techno-

logy; [see Abstract & C 7, L 38 to C 9, L 36] disturbance estimating means based on an expansion system based on the mathematical model for estimating a disturbance of the control object in accordance with an input signal inputted into the control object and a detection signal detected from the control object [see FIG. 3, C 10, L 07-43]; compensating means based on the mathematical model for compensating for a deviation between the detection signal and a target value and for outputting a corresponding control signal [see FIG. 3, C 10, L 07-43]; and subtracting means for subtracting the control signal of the compensating means from a disturbance estimated value of the disturbance estimating means. [see FIG. 1, item 55, C 03, L 23-40]

Claim Objection(s)

5. Claims 8 & 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
